Collaborator

Note that this is not for production usage, but pending a decision to include NDP proper in the built artifacts. This simply allows doing a build that automatically includes NDP with the build packages, such that it can be used for testing and for the driver integration tests.

Usage:

```
cd packaging
mvn clean package -Dfeature-ndp -Doverwrite
```

`overwrite` is needed since the licenses include one more dependency.

  Add `-Dfeature-ndp` toggle to include NDP in packages built by packaging.  399b12b
