First word matching in Neo4j with lucene

{ USE STACK OVERFLOW TO
FIND THE BEST DEVELOPERS }

 stackoverflowcareers

▲ I'm using Neo4j 2.1.7, and I have an index called `people` that uses `lucene` :

0

```
db.index.forNodes("people", Map(PROVIDER → "lucene", "type" → "fulltext"))
```

The query:

```
START n = node:people("name:*beri") RETURN n
```

Returns a node which attribute `name` is `BERI CESAR` .

But, the query:

```
START n = node:people("name:beri") RETURN n
```

Returns `0` rows .

Does anyone know why? I expect the second query to return the same.

`lucene` `neo4j` `cypher`
