# ORDER BY variable undefined

New issue

Closed

As with my other bug report, this query works correctly on both 2.1.5 and 2.2.0:

```
MATCH (p:Person) with p, rand() as rng return p, rng
```

but this one only works on 2.1.5:

```
MATCH (p:Person) with p, rand() as rng return p ORDER BY rng
```

and on 2.2.0 gives the error:

```
rng not defined (line 1, column 58 (offset: 57))
"MATCH (p:Person) with p, rand() as rng return p ORDER BY rng"
```

Further to this, the following command works:

```
MATCH (p:Person) with p, rand() as rng return p, rng order by rng
```
