# Is there any way to bypass authentication in 2.2

New issue

Closed

ktei opened this issue Mar 26, 2015 · 1 comment

ktei commented Mar 26, 2015

We upgraded to 2.2 but noticed that it needs authentication token for REST API, which means change in our back-end code, which we prefer to do later. Currently, is there any way to bypass the authentication? In that case we don't need to change back-end code for now.

Many thanks

See: <http://neo4j.com/docs/stable/security-server.html#security-server-auth>

In neo4j-server.properties:

```
# Disable authorization
dbms.security.auth_enabled=false
```
