bunkat commented Mar 25, 2015

I'm using FireFox 30.0 on Ubuntu 14.04 and I no longer see any results from my queries. In the console I see a lot of 'no element found' log entries. The same query in Chromium on the same machine works as expected.

Owner

Hi @bunkat,

This is likely a cache issue in your browser, rather than a bug with Neo4j. Please try doing a shift-reload of the page, or clear the cache as described here: [https://support.mozilla.org/en-US/kb/how-clear-firefox-cache#w\\_clear-the-cache](https://support.mozilla.org/en-US/kb/how-clear-firefox-cache#w_clear-the-cache)

If that doesn't work, then please feel free to provide more details.

Cheers,  
Chris
