

Neo4j >

SDN 4.0 and Spatial.

Just seen the announcement about SDN 4.0.

Quick question: I'm using neo4j spatial, which doesn't appear to be supported yet. Does this mean that I need to stay with SDN 3.x? Or can I use the old spatial plugin with 4.0?

If I stay with 3.x, is it compatible with neo4j 2.2? Or am I stuck on 2.1.x until the SDN spatial integration is complete?

Thanks
