Stack Overflow is a question and answer site for professional and enthusiast programmers. It's 100% free.

Take the 2-minute tour

Load XML to Neo4j

Work on work you love. From home.

stackoverflowcareers

-1

I need to load this XML file with brainstorming Ubuntu data in a GraphDB Neo4j. The analysis would be for my master thesis. I searched any alternatives, but I have not been able to organize to import.

Dataset

xml neo4j dataset ontology

You can try [xml2neo](#) which processes XML documents and produces a set of cypher statements that imports the data into neo4j. From then, you can transform and query the graph as needed.
