

:Schema query never finishes

Hello,

I've been playing with a neo4j db, I have two indexes on fields, and cypherwise everything works alright. Except that querying :schema never finishes.

Anybody getting the same behaviour?
Is there anything I can provide as feedback (logs ..etc?)

No never seen that,

can you provide: data/graph.db/messages.log
also look in the javascript console

which version are you using?

Can you try to run "schema" here: <http://localhost:7474/webadmin/#/console/>

Thx Michael
