Neo4J 2.2.1 how to set the timeout?

3 posts by 2 authors

Hi Everyone,

I used the following code in my old neo4j graph 2.1.4 (neo4j-server-properties) and it is working:

```
# timeout in milliseconds (180 minutes)
org.neo4j.server.webserver.limit.executiontime=10800000
```

But when I do the same in the new version 2.2.1 there is an error so any help?

Thanks in advance.

What error do you see?

Michael

It has been solved. I forgot to write the following :(

```
execution_guard_enabled=true
```

in conf/neo4j.properties

Thats why I got error.

Thanks Michael.
