Neo4jclient C# get all nodes and relationships to JSON

▲
-1
▼

I want to get all nodes and relationships to JSON. If i execute this in the neo4j-browser i get what i want. (<http://neo4j.com/developer/guide-data-visualization/>)

```
:POST /db/data/transaction/commit
{"statements":[{"statement":"MATCH path = (n)-[r]->(m) RETURN path",
"resultDataContents":["graph"]}]}
```

Using Neo4jclient in my ASP.NET application, and don't know how to translate that. I have checked the example project they have on their site, but it doesn't help me.

Eventually i will use the result to present it with d3. But i cant get the JSON to work.

Can you add more details about what exactly you can't do in ASP.NET? – [Aleksandr Ivanov](#) Apr 9 at 21:25

I think you're looking to do something like:

<http://geekswithblogs.net/cskardon/archive/2013/07/23/neo4jclient-ndash-getting-path-results.aspx>

The code on that page is for the older Cypher way - but aside from using `.Start` which you no longer need - it should work for you.
