How to specify the special control char for delimiter?

Work on work you love. From home.

stackoverflowcareers

I have some files got from hive which use '\001' for delimiter. But I failed using neo4j-importer to import nodes and edges. How can I specify '\001' correctly?

neo4j

Right now afaik it's not possible to specify it.

If you're able to run java you might call

```
org.neo4j.tooling.ImportTool.main(args)
```

and provide as part of your args

```
..., "--delimiter", String.valueOf((char)0), ...
```

Do you have any idea about the long-time no-activity when I imported 24GB nodes file and 300GB edges file using Neo4jImport ? It frozen nearly two hours after I have imported 372M nodes. Is it normal? – [luck](#) Apr 6 at 12:31

well, I used ^A to correctly specify it. – [luck](#) Apr 13 at 4:58
