## Talend : Set up talend 5.6.1 to use java 1.7 jdk on macosx

0

Using Talend Big Data Studio. Trying to use neo4jConnection for version 2.x.x, shows error "Component required Java 1.7"

I have setup JAVA\_HOME path variable in my .bash\_profile Also selected Preferences in Talend to point to Java 1.7 JRE.

Can anyone please let me know if this has worked for anyone?

if you need run Talend with an specific java version, you can run it using the param "-vm".

i.e

```
./TOS_BD-linux-gtk-x86_64 -vm /usr/java/jdk1.7.0_75/bin
```

Just need to specify the [path to your JRE or JDK] after the -vm.
