## How do I list all labels in my neo4j database using the java api?

asked 4 months ago

viewed 55 times

I'd like to list all labels in my neo4j database.

1 For example, in my site, I have 'songs' which I'd like to tag with labels such as 'jazz', 'classical', 'hiphop', or 'funk'. I can do this, but then I also want to let users know which tags already exist by returning all the labels (aka tags) in my database.

★ I could use nodes for tags instead, but I thought tagging would be a good use case for labels. Am I missing something?

java neo4j
