How do I zoom in/out in the web client? are there other clients?

I have a large model and would like to see more than the default view shows. How do I zoom in/out in the web client? are there other clients?

I don't believe that you can zoom in/out the web client. You do have a few options:

3

- You can go full-screen to give yourself some more real estate
- In Neo4j 2.2 you have the ability to drag the viewport to see more
- Also in Neo4j 2.2, you can click the download icon and download either a PNG or SVG. This isn't interactive, obviously, but can be helpful

For larger views of your data, [Gephi](#) and [Linkurious](#) can be helpful

One of the best visualisations for graphs is KeyLines <http://keylines.com/>, however its not particularly cheap!

2

This allows zoom in/out and very sophisticated styling of your graph

Ah, right, thanks! I knew that there was a Linkurious alternative but couldn't remember what it was ;) – [Brian Underwood](#) Apr 7 at 13:39
