Owner

After these changes, response to the example request in #4145 ends like this:

```
"errors" : [ {  
  "message" : "Cannot find node with id [-1] in database.",  
  "code" : "Neo.ClientError.Statement.EntityNotFound"  
} ]
```

instead of the previous behaviour which produced responses ending like this:

```
"errors": [ {  
  "code": "Neo.DatabaseError.General.UnknownFailure",  
  "message": "Cannot find node with id [-1] in database.",  
  "stacktrace": "org.neo4j.server.rest.web.NodeNotFoundException: Cannot find node with"  
} ]
```
