1. If I set node parameter as int32:
REST API saves it as int32
Browser interface saves it as int64
Difference confuses
2. If I make SUM of two numbers 1073741824 (int32) I expect 2147483648 (int64) as a result, but actually get -2147483648 (int32)
