Collaborator

I like deleting code. Issued against 2.2 to keep divergence down. There will be conflicts when merging to 2.3, but they are probably easy to resolve.

import org.neo4j.graphdb.Transaction;

/**

- * A builder for controlling certain behaviors of a transaction.

- * Methods that return {@link TransactionBuilder} returns a new instance

- * with the updated configuration that the method call modified.

- * When the behavior is as desired a call to {@link #begin()} will

- * begin the transaction and return a {@link Transaction}.

- *

- * <pre>

- * // To begin a transaction with default behavior

- * Transaction tx = graphDb.tx().begin();

- *

- * // To begin a transaction with relaxed force

- * Transaction tx = graphDb.tx().unforced().begin();

tinwelint added a note Apr 6, 2015

Collaborator

Why remove javadocs?

chrisvest added a note Apr 6, 2015

Collaborator

Because it's a lie. This API cannot be used for anything anywhere anymore.

tinwelint added a note Apr 7, 2015

Collaborator

It has been deprecated a while now. You changed the deprecation description, but I think you can

simply delete this class altogether. No one will ever miss it.

Add a line note

tinwelint commented Apr 6, 2015

Collaborator

Getting ye old dust broom out eh? I agree, removing code is exhilarating. There's way too much of it.
