# Quoting identifiers in with statement can fail 🐛

New issue

The following query fails against neo 2.14 and 2.17 (and probably others)

```
MATCH (`a`) WITH `a` RETURN *
```

The exception contains `Unknown identifier `a``. Replacing it with any of the following works

```
MATCH (a) WITH a RETURN *
MATCH (`a`) WITH `a` as a RETURN *
MATCH (`a`) WITH `a` as b RETURN *
MATCH (`a`) WITH `a` as `a` RETURN *
```

Owner

Hey @leocrawford,

Thanks for your report! I've confirmed that we've resolved this in Neo4j 2.2.0, so perhaps upgrade?

Cheers,  
Chris

Thanks. Will do.

Cheers  
Leo
