

Results not appearing neo4j query

21 posts by 3 authors

I have only about 8000 nodes in my database and when I do match n return n I never get any graph back, any reason why or how to fix?

The screenshot shows the Neo4j Cypher query interface. At the top, the query `$ match n return n` is entered. Below the query bar, there are three status indicators: `*(8086)` in a grey box, `Queue(3784)` in a purple box, and `Website(4301)` in a red box. On the left side, there is a sidebar with two icons: a graph icon labeled 'Graph' and a table icon labeled 'Rows'. The main area is currently empty. At the bottom of the interface, a status bar reads 'Displaying 8086 nodes, 0 relationships.'

Hi,

If you do not get any results, then how do you know that you have 8K nodes?

Also please check if your neo4j console is pointing to right Neo4j Database.

would be good if you can tell us the exact syntax used for connecting via neo4j-shell.

Thanks,
SUmmit

You can see it in my picture below. I am using the default web interface <http://localhost:7474> and my query is match n return n. It says displaying 8000 nodes and 0 relationships but when i do match n return n limit 500 it works fine. it renders the graph and shows the relationships

Sorry - I missed to see the image in your last post.

There could be a bug in UI that it cannot graphical represent 8K nodes on specific browser version. Try using "Rows" options at your extreme left hand corner.

I tried with Chrome with some 1000 nodes and it works fine.

I think there is no purpose solved by viewing 8k Independent nodes without any relationship. It will not make much of a sense.

Let me know if you are trying to do something with these 8k nodes.

Thanks,
Sumit

Re: [Neo4j] Re: Results not appearing neo4j query

Also check the js console of your browser

Most likely it is only busy rendering

Re: [Neo4j] Re: Results not appearing neo4j query

Ok, I will check. I've left it for several hours with no graph image appearing. Is there some setting I can change if it is timing out or something?

- show quoted text -

Dan Tascher In the console it looks like there is an overflow trying to build the tree: {"results":[],"errors":

May 6

Michael Hunger Please share your query. Michael May 6

Dan Tascher match n return n May 6

Michael Hunger Which version are you using? May 11

Dan Tascher 2.2.1 Best Regards, Dan May 12

Michael Hunger

May 12

seems to be a bug which should be fixed in the next milestone.

it's the new runtime, you can choose the old runtime with

cypher planner=cost runtime=interpreted match (n) return n

HTH,

Michael

Dan Tascher How do I use that? When I put that May 13

Michael Hunger

May 13

sorry prefix with "cypher"

cypher runtime=interpreted match (n) return n

I copy and paste your statement but I still get an error:

```
$ cypher runtime=interpreted match (n) return n
```

```
Invalid input 'u': expected 'e/E' (line 1, column 9 (offset: 8))
"runtime=interpreted match (n) return n"
      ^
```

Neo.ClientError.Statement.InvalidSyntax

Best Regards,
Dan

May 16

Oh sorry I was confused

This is for 2.3-m1

I thought you said so

For 2.2.1 try

planner rule match n return n

But it should not happen at all

So, to reiterate again,

you download and install neo4j 2.2.1

you start it, run **:play movies**

and import the data

and then you run **match n return n**

and nothing returns?

Perhaps it's a browser/javascript issue did you try shift+reload?

Michael

They do have a relationship, but when it never renders it says they have no relationship.
