When I run Neo4JShell.bat I get C:\Program Files (x86)\Neo4j Community\bin>Neo4jShell.bat The system cannot find the path specified. Error: Could not find or load main class org.neo4j.shell.StartClient

Java installed as C:\Program Files (x86)\Neo4j Community\bin>java -version java version "1.8.0_40" Java(TM) SE Runtime Environment (build 1.8.0_40-b26) Java HotSpot(TM) 64-Bit Server VM (build 25.40-b25, mixed mode)

Any thoughts?

neo4j

Run the Neo4j Community executable. In the dialog that appears, select "Options", then "Command Prompt". That sets up your environment. Then run the shell with "Neo4jShell".

Try the following it should work (let me know if it does not):

1. "Start" the Neo4j Community Server

2. On the same window which was used for step "1.", click on "Options" button.

3. A new Window opens. Click on the button "Command Prompt"

4. A command prompt window opens up, type "Neo4jShell" or "Neo4jShell.bat" (both works equally fine). This would take you to the Neo4j shell!!
