Neo4j randomly shutting down

▲

0

▼

★

I am running neo4j on an EC2 instance. But for some reason it randomly shuts down from time to time. Is there a way to check the shutdown logs? And is there a way to automatically restart the server? I couldn't locate the log folder. But here's what my `messages.log` file looks like. This section covers the timeframe when the server went down (before 2015-04-13 05:39:59.084+0000) and when I manually restarted the server (at 2015-**04-13** 05:39:59.084+0000). You can see that there is no record of server issue or shutdown. Time frame before 2015-**03-05** 08:18:47.084+0000 contains info of the previous server restart.

                                                                                   744 ● 1 ● 4 ● 23

It should not shut down, can your share your logs in data/log/* and data/graph.db/messages.log ? –
Michael Hunger Apr 13 at 6:16

@MichaelHunger added few details – pewpewlasers Apr 13 at 6:48

from which log is that? – Michael Hunger Apr 13 at 10:33
