Hi,

I'm trying to start Neo4j 2.2 using Rexster 2.6, and I get the following exception.
Any clues will help...

```
[WARN] GraphConfigurationContainer –
java.lang.RuntimeException: Could not resolve dependency of
type:javax.transaction.TransactionManager
com.tinkerpop.rexster.config.G
raphConfigurationException:java.lang.RuntimeException: Could not resolve

Neo4j 2.2 doesn't have JTA anymore

So it will probably need a 2.2 version of TP3 to work with.
I was working on supporting that but Apache legalese makes it hard.

What do you use Rexter for?

Michael

I see, then I'll have to wait for TP3 GA.
I'm using Rexster (RexPro to be precise) for transmitting Gremlin scripts from a .NET client.
Is there any alternative to using Rexster in Neo4j 2.2?

Effy

A viable alternative would be to use a Neo4j driver with Cypher instead?

Michael

Effy Teva   Apr 1

My use case requires Gremlin.

Thank you Michael
