Neo4j-shell returns errors if comments are in the called file

▲

0

▼

★

Using neo4j-shell (v2.0.0 M05) I get errors when running script file (-file) with comments (//comment) in it. When I remove the comments, all works fine.

shell   neo4j

How does it fail? And what does your file look like?

I think shell comments are starting with a hash `#` , and Cypher comments start with `//` , you're right that's an inconsistency

I used it with both kind of comments in the past
