chrisvest commented on `community/pom.xml` in `07cf10f` Dec 3, 2014   `Collaborator`

This introduces a cycle in the build, because neo4j-harness has a dependency on community-build.

nawroth replied Dec 4, 2014   Owner

It didn't have it as a dependency, but as parent. BTW this commit changes the parent of neo4j-harness as well (but for different reasons; parent/module relationships and dependencies are separate concerns). Seen a warning somewhere in the build?
